## Mrs. A. MacDonald Buried at Eckville

Mrs. William (Alice) MacDonald, 48, a resident of the Eckville district for 13 years, died Thursday, April 7 in the Holy Cross hospital in Calgary. Funeral services and burial were in Eckville Sunday, with Rev. Mr. Popcock of Sylvan Lake officiating.

Mrs. MacDonald was born in Carberry, Man., and received her education there. She was married in Calgary in 1926 and moved to Eckville with her husband the same year. They lived there until he was drowned April 6, 1943, and Mrs. MacDonald moved to Conder, Alberta, to teach school. Last year she moved to Carbon, where she taught school and music.

Surviving are one daughter, Kay; one brother, C. A. Geddy; one sister, Mrs. J. Clarke, of Prince Albert, Saskatchewan.

## Local News Items

Mrs. James Hunt and family are visiting in Carbon during the Easter holidays at the home of Mrs. Len Orhauser.

Mr. and Mrs. Percy Smith and Miss Marie Cunningham spent Sunday in Carbon visiting friends.

Mrs. Stan Macchell and son, Gordon, and Mrs. Merton are visiting at the home of Mrs. Margaret Atkinson.

Mr. and Mrs. Albert Gieck and daughter spent the Easter week end visiting with relatives and friends in Carbon.

Mr. and Mrs. Joe Heffernan are visiting at the home of the latter's parents, Mr. and Mrs. Bill Reid.

Mrs. Gladys Jones of Saskatchewan is visiting with her sister, Mrs. S.J. Garrett.

Mr. and Mrs. Buster Simpson and family left Friday for Stettler, where they will make their future home.

Mr. and Mrs. C.H. Nash spent the Easter holiday at Stettler at the home of their son-in-law and daughter, Mr. and Mrs. C. Priesen.

Mr. and Mrs. Len Poxon of Carbon and Mr. and Mrs. Fred Poxon of Drumheller have returned from a visit at Victoria, B.C. Mr. and Mrs. Fred Poxon have been spending the winter in Victoria and Mr. and Mrs. Len Poxon have been visiting them during an extended vacation.

Mr. and Mrs. George Grainger have purchased the Becker farm eight miles west of Carbon.

Mrs. Ernie Nelson and family of Leduc are spending the Easter holiday with Mrs. V. Alderson.

## COURT RULES 20-YEAR-OLD NOTE PAYABLE

The Alberta Appeals Court, in a unanimous decision, has ruled that Mrs. Lella Alexander of Canastra is entitled to collect \$10,078 on a promissory note for \$5,335 signed almost 20 years ago.

The court upheld an earlier Supreme Court judgment that the note was still valid. The judgment was appealed by the Royal Trust Company, trustee of the estate of William Guy Shell. The note, with interest at five per cent was made by the late Mr. Shell in favor of Austin Alexander in December, 1929. Court was told nothing had been paid on the note.

Mrs. Alexander is administratrix of the Alexander estate. Mrs. M. Fay Stipe of Carbon, a beneficiary of the Shell estate, was a party to the appeal.

Mrs. Stipe and the Royal Trust Company raised the Statute of Limitations as a defence against payment.

The court ruled that the Statute of Limitations did not apply in this case.

## LONG YEARS AGO

Thursday, April 18, 1929

After spring weather which prevailed for a month, the weather turned colder last week and Thursday night and Friday the worst snow storm of the season occurred, more snow falling during that time than during the whole of the winter.

Born to Mr. and Mrs. S.J. Garrett on Monday, April 8, a son.

A fire Saturday, April 13, almost completely destroyed the Carbon Bakery and the cafe next to it. The fire started in the bakery and before fire equipment could be brought into use had spread to the cafe. The bake shop building was owned by R. McKinnon and the bakery operated by R.C. Barr.

Jacob Ziegler got an early start with seeding this year and prior to this storm had 200 acres seeded.

## Fish, Game Ham Shoot Successful

A highly successful ham shoot sponsored by the Carbon Fish and Game Association was held at the local trap shooting grounds Wednesday, April 18, with a number of out-of-town gun artists attending to compete with local nimrods.

Following is a list of winners and the number of hams won by each:

G.E. Schell 2; B. Schuler 1; L.F. Poxon 5; G. Eslinger 4; D. Rusler 1; C. Cressman 1; Davis 1; Egan 1; Roddekoop 1; Ted Schmidt 1; Hemling 2; Sorenson 1; Syd Wright 1; Evans 3; Batts 1; G.W. Schell 1.

The Senior Ladies' Aid served lunch at the shoot.

## CARBON UNITED CHURCH TO CELEBRATE 40TH ANNIVERSARY

The Carbon United Church this year is celebrating the 40th anniversary of the founding of the church. A service in honor of the occasion will be held on Sunday, May 1, at 11 a.m. It is expected that a large number of the old-timers of the Carbon district will be present.

## Legion Notes

The regular monthly meeting of the Carbon branch of the Canadian Legion was held Monday evening, April 18, with a good attendance of members. A general discussion and regular business meeting was held. Thanks is extended by the Legion to all those who so generously donated articles to the community sale, and also to N. Boese, the auctioneer, S.F. Torrance, the clerk, and all others who gave their services.

A full report of the sale will appear in The Chronicle within the next two weeks. Some accounts are not yet closed and if these are not attended to within the next week the books will be closed and the accounts considered as donations.

## Canadian Trout Eggs Flown To Colombia

Something of a record was achieved recently, when 50,000 lake trout eggs were flown from the fish hatchery in Port Arthur, Ont., to the South American Republic of Colombia, with a loss of only eight. Colombia expressed appreciation to the Canadian authorities responsible for packing and shipping these trout eggs, and thought that the experiment would prove beneficial to their country. The fingerlings were put into Lake Cocha. In southern Colombia.

## Fire Damages Carbon Laundry

A fire which started about 10:30 Monday morning, April 18, in the Carbon Laundry completely destroyed the interior of the building and caused severe burns to the proprietor, Tom Fong. The fire apparently started while Mr. Fong was cleaning clothes and he received severe burns about the hands and face.

Prompt action by the volunteer fire brigade confined the blaze to the laundry and nearby buildings were saved.

## Unique Botanical Experiment Succeeds

A type of fir tree which was believed to have been extinct for more than 100,000,000 years has been successfully grown from seed in Britain. Details of this fascinating botanical achievement were given in the annual report of the Timber Development Association, just published. Several seeds of the tree were sent to Britain from Central China. They were taken from some specimens of a Mesozoic glyptotrochids found growing there by an exploratory expedition. This tree has only been known from fossilized remains until some Chinese explorers found a single specimen growing in a remote valley about two years ago. When fully developed this type of fir is said to reach 150 feet in height and measure seven feet in diameter. The mildest possible climate is recommended for rearing plants from its seed.

## Termination Of UNRRA

FOR FIVE AND ONE-HALF YEARS the United Nations Relief and Rehabilitation Administration, known as UNRRA, carried on a great post-war relief project which helped immeasurably in dealing with the distress of those who suffered directly from the effects of the war. The world-wide operations of the administration were completed last September, but it was formally voted out of existence on March 31st of this year, when the Governing Central Committee agreed that the emergency task which it had undertaken was now completed. Remaining funds were turned over to successor organizations. It is encouraging to know that the need for such services are at an end, but the work of that great humanitarian effort will not soon be forgotten.

### Supplies Sent From Canada

The total cost of UNRRA was estimated to be just under \$4,000,000,000. Reports of the activities of the Administration show that \$3,968,292,723 in cash, supplies, and services were distributed in various parts of the world during the five and one-half years of its existence. In carrying on the task of bringing relief and help to those who had suffered material loss and physical hardship because of the war, a great deal of help in the form of cash and supplies was sent from the United States and Canada. Canada was able to contribute much in the way of vitally-needed food supplies for those areas where the war had interfered with crops and normal food production and distribution.

### Services Will Be Remembered

While UNRRA has now gone out of existence it will without doubt long be remembered for the great service it performed in bringing relief to war-torn countries. It is to be hoped that there will never again be need for such an organization, but UNRRA showed what could be done by united effort in solving such gigantic problems as those faced after the war in attempting to rehabilitate the many thousands of homeless and destitute people left after the hostilities ended. While this century has seen some very terrible developments in respect to warfare, it has also seen some great humanitarian undertakings, of which UNRRA stands out as one of the finest, and its work, and the men and women who helped to carry it out, will not soon be forgotten.

**BLANKETS, CLOTH, YARNS,** battie, etc., made from your own sheep's wool, or if you have old woolens or cottons we will remake them into beautiful blankets or rugs. Write **BRANDON WOOLLEN MILLS** Brandon, Manitoba

### DOES YOUR BACK ACHE?

Sitting in a draft—working in a damp place—wet feet—these are different things which may cause a backache! But there's one way thousands of Canadians have found to help relieve this condition—Dr. Creel's Kidney-Liver Pills. This effective remedy tones up both the kidneys and the liver—and brings welcome relief from pains in the small of the back caused by "cold" in the kidneys. So insist on the reliable remedy—proven by over half-a-century's use—Dr. Creel's Kidney-Liver Pills. At all drug counters. 19

### FARM LAND VALUES

The average value of occupied farm land in Canada in 1948 is reported at \$20 per acre, an increase of 11 per cent. over the average indicated in 1947, and an increase of 62 per cent. over the 1935-39 average, according to the Dominion Bureau of Statistics. Increases over 1947 levels were reported in all provinces with the exception of New Brunswick.

**NEW VARIETY**—A new all-purpose variety of poultry, known as Barred New Hampshire was on display during the University of British Columbia's "Open House" recently.

### Stock Prices Best In Years

**BRANDON, Man.**—The average paid for purchased bulls at the annual sale in the winter fair building here was the highest in 25 years and may have been the highest in the history of the sale, said J. R. Bell, provincial livestock commissioner.

In the Hereford class 26 bulls sold for an average price of \$561.52 and two females for an average of \$460. Top price for Hereford bulls was \$1,000.

Fifty-seven Shorthorn bulls averaged \$524.24 and one female sold for \$124. Top bull was \$1,225.

Eleven Aberdeen Angus bulls brought an average of \$431.36 and one female brought \$126. Top for Aberdeen Angus was \$525.

### FUNNY And

### OTHERWISE

**Sunday School Teachers:** "And so Adam was very unhappy. Now, Willie, can you tell me what great misfortune befall him?"

**Willie:** Please, Miss Parson, he got a wife."

**Late for dinner at his brother's house, the well-known movie star Barry Fitzgerald stormed into the dining room and exclaimed:** "Some lingering guests detained me at my place, or I would have been here on time?"

**"Lingering guests, eh?" his brother exclaimed sympathetically.**

**"Yes," Barry rejoined. "They are the kind of people who, when they stand up, think they have gone!"**

**"A burglar broke into my house when I was still at the club," said Smith to his friend.**

**"Did he get anything?" asked the friend.**

**"Yes, poor devil. He's in hospital. My wife thought it was me."**

**A bishop attended a banquet and a clumsy waiter dropped a plate of hot soup in his lap. The overgrown glowered around with a look of agony and exclaimed:**

**"Will some layman please say something appropriate?"**

**Jones was telling Smith that he had gone to a lawyer for advice.**

**"Why spend money on a lawyer?" asked Smith. "Didn't you notice that he read the advice out of a book?"**

**"Sure," replied Jones. "But he knows what page it is on."**

### THE TILERS

### \$300 Duty Free From U.S., But Buy On Credit

How's your credit in U.S.? It has to be good—or you'll have to get it established—if you plan to take advantage of saved Canadian customs regulations on goods you bring back from that Stateside visit.

Those regulations, effective Jan. 1, allowed Canadians to bring back goods to a maximum value of \$100 duty-free every four months; \$300 for the year.

But — the purchases have to be made on credit. You get no addition to the \$150 travel ration when you start out. Instead the Foreign Exchange Control Board promises to allow you to honor invoices on your return, on presentation of customs clearance papers.

That way FEBC keeps track of things. And this applies as well to anyone who's able to get more than the \$150 basic ration.

Of course, if you want to use your \$150 travel ration to buy for cash it's okay. But these purchases are included in the total \$300 duty-free goods.

### Manitoba Agriculture Dept. Worried Over Grasshopper Prospects

WINNIPEG—Officials of the Manitoba agriculture department said that "soon tens of thousands" of farms in the province may be hit by grasshoppers this year and that, if the season is hot and dry, the outbreak may have a severe effect on the entire province.

H. E. Wood, director of extension work, recommended early seeding to protect the crops.

## Expect Radioactive Baked Seeds To Give Bigger Crops

OAK RIDGE, Tenn.—A new move for using atomic energy to make better and bigger crops started here this spring.

Crop seeds are getting a radioactive baking such as no seeds of earth ever before received. The purpose

is to produce new types of plants in numbers greater than ever have been possible by other methods. The seeds are placed in long, thin trays which are heated completely through the massive concrete walls that enclose the big Oak Ridge atomic oven, or reactor. These trays are pushed into the heart of this pile, in holes in the graphite and uranium where atoms are spilling on all sides.

The tremendous rays produce mutations, that is, new types of plants. This kind of radiation—usually given by X-rays—produces only one good plant to thousands which are useless.

The atomic pile is expected to increase the number of mutations. The percentage of good ones is expected to remain constant. In this way it is hoped that a far greater number of useful mutants will be obtained.

From corn seeds now plants are sought that will produce more sugar to make better silage or that will resist diseases already beginning to attack American hybrid corn.

Other specific corn improvements are sought so that the agriculturist of the future will grow not just one kind of corn, but various corns for special uses.

For potatoes, bigger and heavier tubers are sought, also potatoes that will keep longer in storage. Another aim is to resist nematodes and wire worms which are depleting numerous potato crops.

The Oak Ridge baking so far has been cotton and soybean seeds for the Rohm and Haas Co. and for the U.S. Army, for the Ohio Agricultural Experiment Station, and six other institutions. Seeds not given for the University of Michigan Botanical Garden.

The Argonne National Laboratory near Chicago has been "raying" corn tassels and corn stalks and seed.

The earliest recorded mention of Indian summer was made in 1794.

## Spring-Into-Summer Fashions For 1949

Shown at left is a suit that can be worn from morning till night. For evening wear it can be dressed up with costume jewelry. Note the jutting accents at the pockets and the thin, wide side kick pleats on the skirt. At right is a thin and crisp, Spring-into-Summer dress of navy rayon and rayon seersucker. Small, self-fabric buttons are neatly clustered in three.—Central Press Canadian

## Veteran Edmonton Barber Recalls Experiences Of Meeting Noted People

EDMONTON.—Want to know about people? Then ask W. R. Coughlin who has been in the barber business for 42 years.

Mr. Coughlin, who recently sold his business on Jasper Avenue, describes the Duke of Windsor as a "regular gentleman" who writes his own speeches. Years ago, as the Prince of Wales, he wrote one while having his hair cut in the Coughlin establishment.

In the old days many show people came to the barber shop and Mr. Coughlin recalls the late Will Rogers, known then for his rope-twirling rather than his wit.

Back in the days when Jack Dempsey had just been crowned heavyweight champion of the world, he visited the city and some enterprise.

ing Edmontonians tried to sell him what they described as "a very fine" husky dog for a large price.

Dempsey was cautious and would neither the dog nor some real estate which was also offered in the barber shop.

Mr. Coughlin emphasizes that he is not retiring as "I'm still under 40." He and his wife will continue to reside in Edmonton but will have more time to devote to their farm in the nearby Leduc district.

Back in Smith Falls, Ont., where he was 15, Mr. Coughlin shaved his first customer. His own whiskers weren't in evidence at the time.

He started his Edmonton shop in 1907 with four chairs. It was up to 15 by 1912 and, at the time, was one of the largest barber shops in Canada.

In 1907, there were only five barber shops in Edmonton and haircuts came at the rate of 25 cents and 15 cents, respectively.

In 1924, Mrs. Coughlin took over the beauty salon in conjunction with the barber shop. "I made a barber out of her," said Mr. Coughlin. "She was a school teacher."

## GEMS OF THOUGHT

### TAKING OFFENSE

The happiness of life depends less upon what befalls us than upon the way in which we take it.—Lavater.

It is not well to see everything, to hear everything; let many causes of offense pass by unnoticed.—Seneca.

Time to me this truth has taught: More offend from want of thought than from want of thought.

When men speak ill of thee, so live that nobody will believe them.—Plato.

To ruminate upon evils, to make critical notes upon injuries, and to be too acute in their apprehensions, is to add unto our own tortures, to feather the arrows of our enemies, and to resolve to sleep no more.

—Sir Thomas Browne.

To punish ourselves for others' faults, is a superfluous folly. The mortal arrow shot from another's bow is practically harmless, unless our own thought bars it.—Mary Baker Eddy.

### HOW TO LIVE LONG

Did you ever notice that the people who are hard to muster ... the ones who don't get in a stew about minor troubles ... are the people who keep younger longer? Wise people know that a calm outlook on life pays off.

Salt is an important ingredient in the manufacture of rayon.

The Mohammedans were the first recorded drinkers of coffee.

Money was first coined (stamped with raised borders and fluted or grooved edges) to prevent the fraudulent removal of metal and to protect coins from wear. The mulling of money was first used as a regular practice in England until 1602.

Mr. Alexander may be in possession of some idea because at the age of eighty he is in the pink of condition and claims to be able to do twice as much work in any day as a man of forty.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

## Decorative Speaking

(By Francis James)

Dear Miss Francis: We recently redecorated our living room walls and have run across a snag we didn't foresee. The wallpaper is beautiful, with a light background and very large leaf patterns in brown and rust with minor touches of turquoise and red. It looks fine as it suits the shape and size of the room. But across one side there are two large windows separated by a stone fireplace. These seem to cut up the wall and the large pattern looks peculiar. Also, we have a large oil painting (our one and only) a full scene in brown and russets in a bronze frame. It shows off beautifully over the fireplace, but it makes that wall look monotonous.

We'd like to do something about that one side of the room, and are wondering about these four walls you hear so much about. We can't get any more of the wallpaper we've used so want to be very sure of anything we do before we take it off. Do you have a contrasting pattern of some kind would be all right on that wall?

Dear Mrs. K. B.: A focal wall in this room would be an excellent idea. As a matter of fact, this is about the only solution there is when the pattern of the wallpaper used in the rest of the room is too large to look well on a wall.

You needn't worry about removing the present paper. If you should, you won't spot the effect of the room if you are careful. As you have said nothing about the furniture, drapery, floor coverings, etc., in the room, I can't really pass my opinion on the color of the paper or the wall. You should, of course, use a plain or weave effect in one of the neutral colors, as there is no pattern and color in the rest of the wallpaper, and in your papering provide sufficient color for that wall area.

The value of these tablets has not been as satisfactory demonstration, it is stated by F. J. McCune, President, National Institute of Health, Bethesda, Md., in a report in the Association.

"A dietary supplement of fluoride seems to have possibilities in caries control."

Fluoride Tablets

Caries is the most common dental disease in the world. It is taking fluoride tablets in lieu of fluoride drinking water for prevention of tooth decay.

## : STAMP CORNER :

By JAMES MONTAGNES

Argentina has issued a stamp of a cartographer's congress (top left), and a stamp for aviation day (top center). Japan has issued a stamp with surtax for Red Cross (top right).

Costa Rica has issued a stamp to Spanish author Cervantes. Costa Rica has issued a stamp to Michael Agricola, Finnish writer, who died 400 years ago.

Quilting, the Norwegian who sold day to the Germans and ruled during the occupation, issued a stamp to himself.

Edward Grieg, composer, appeared on 1943 stamps marking a century since his birth. The Free Norwegian government at London issued a set of stamps that year showing the activities of the various armed and merchant marine forces.

In 1944 there was a stamp to mark the 30th anniversary of the first flight made over the North Sea. In 1946 there was a stamp issued to commemorate the training of Norwegian airmen in Canada, and in 1947 a new stamp appeared for King Haakon as well as a long set to the 20th anniversary of the Norwegian post-office.

Last year King Haakon's 75th birthday was marked with a special stamp issue, and a stamp appeared to Adolf Hitler, emperor, whose name is on one of Canada's Arctic islands.

New issues ... Eric has issued new airmail stamps ... Philippines have issued a semi-postal stamp with surtax for restoration of the national library ruined by the Japanese ... Fiji to issue new 10 shilling stamp showing pawpaw tree and 12 stamp showing native policeman blowing a conch shell.

Pennsylvania has issued a stamp showing a polar bear watching a plane fly overhead. In 1928 there was a set to mark a century of the birth of playwright Henrik Ibsen. The next year Norwegian mathematician Niels Abel appeared on stamps to mark 100 years since his death.

During the German occupation from 1940-45, the Quating government issued an historical set in 1941 to the 70th anniversary of Norway's constitution. Then in 1925, to mark an attempted flight to Norway's constitution. Then in 1925, to mark an attempted flight to Norway's constitution.

Then in 1925, to mark an attempted flight to Norway's constitution. Then in 1925, to mark an attempted flight to Norway's constitution.

Then in 1925, to mark an attempted flight to Norway's constitution. Then in 1925, to mark an attempted flight to Norway's constitution.

Then in 1925, to mark an attempted flight to Norway's constitution. Then in 1925, to mark an attempted flight to Norway's constitution.

## Weed Control In Onion Rows

Good weed control in onions was obtained without injury to the seedlings in the Dominion Experimental Station, Harrow, Ont., by spraying the onion rows with Aero Cyanide.

A demonstration plot was set up and some rows were sprayed twice with Aero Cyanide at the rate of 25 gallons per acre. Other rows were left unsprayed. The onions were cultivated between the rows and there was no hand weeding.

During the season only a few weeds appeared in the sprayed rows. The rows not sprayed developed a mass of weeds including lamb's quarters, pigweed, purslane, shepherd's purse, cleopatra and ragweed.

The chemical was sprayed on seedling onions, two to three inches tall, in a one per cent solution. It was also sprayed on set onions and on mother bulbs for seed production in one and two per cent solutions. No injury resulted from the spray.

A thousand foot row was sprayed in the middle of a grower's field of onions on two occasions. This row was free of weeds than the other rows which had been cultivated frequently.

The chemical was sprayed on seedling onions, two to three inches tall, in a one per cent solution. It was also sprayed on set onions and on mother bulbs for seed production in one and two per cent solutions. No injury resulted from the spray.

## Complains Boys 'Bark' At Wife

LISTWELL, Ont.—Dog-catcher Bert Rasmussen got a raise in pay but he's still an unhappy man. He says that since he volunteered for the job last year, boys bark at his wife and heckle him. Official increased his salary to \$40 a year but there's no stopping the heckling. That goes with the job, they said.

## SACRED GANGES WATER WENT SENT TO MONTREAL

NEW YORK.—Eight pounds of sacred water from the Ganges river was sent by plane to Montreal.

The water, packaged in wooden cases, was shipped to New York from Calcutta. It was consigned to W. J. Niles of the Montreal Local Motive Works.

## On The Side —By- E. V. Durling

She that would inspire a noble love must find ways to forget a passion for her mind.

She must be that, which she to be would seem; For all true love is grounded on esteem.

Sincerely more appeals to a generous heart. Than all the crooked subtleties of art.

Insurance against being a quitter. That's what bachelorhood can get in Copenhagen, Denmark. The name of the organization providing this unique policy is Anti-Cohabitation Society. Policy holders are not actually guaranteed a husband. However, if they do not acquire a matrimonial mate within a stated number of years, they are paid a lump sum or awarded an annuity. Naturally the insurance company is in business to make as much profit as possible. The fewer policy holders it has to pay off, the better the profit. So the greater the number of bachelors who can get husbands for their clients. A great idea, what? Somebody should start an insurance company like that.

EXPECTANT FATHERS

It is suggested by a registered nurse that husbands should not pace the room during the birth of their child. She believes this would make a man "man" appreciative of both the mother and the child. A very interesting suggestion. This brings to mind that some of those training schools for "expectant fathers" are offering instruction on how to deliver a child. It is in case of an emergency when no doctor can be obtained. Why can't men get a doctor's training in the way of delivering a child? He told reporters he "learned about it from a book."

PLEASE NOTE

How would you like to be a full-time wife and vitality at the age of eighty? Perhaps you can be. It all depends on knowing the right way to hold your head and neck as you lean your head back and forth.

That's what eighty-year-old F. Matthias Alexander of London claims. He explains it in a book titled "Constructive Conscious Control of the Individual." Mr. Alexander may be in possession of some idea because at the age of eighty he is in the pink of condition and claims to be able to do twice as much work in any day as a man of forty.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

He has been married for 40 years and has 11 children. His wife, Mrs. Alexander, has been married for 40 years and has 11 children.

Soil conservation becoming more and more a vital problem of Western farmers, we are inserting in two issues the following article by Professor G. N. Ruhnke, Director of Research, Ontario Department of Agriculture, with the kind permission of C-I-L Oval.

AT LEAST one-quarter of the world's population has never had enough to eat. The future outlook is even more serious. The world's supply of food is dropping dangerously behind the needs of a rapidly rising population. In the face of this situation, agricultural authorities are asking for immediate soil conservation measures for Canada and for every other food-producing nation.

In spite of famine, floods, and two catastrophic wars in the last three decades, the world's population has been rapidly increasing and has now exceeded this critical ratio of population to arable food-producing land.

Canada cannot lightly ignore the

Against such a background, maintaining the productivity of its soils is Canada's basic agricultural and its number one conservation problem. We can no longer indifferently wear out and abandon farms and move onto new virgin lands at will, must be solved in the areas under consideration. Too many have the impression that soil erosion is a universal problem and that measures for its control are the primary concern in all land use and soil conservation programs. Geological erosion of the

Viewed merely from the standpoint of the agricultural industry's prosperity and the welfare of the farmer (approximately one-third of our population), it is just as important to Canada's national economy to plan for the efficient use of land as for

Both urban and rural Canadians must take stock of such outmoded thinking and its influence on agricultural policies and future programs. We are not permanent owners, but only stewards of the land, to use during our lifetime. This does

This is a matter of real concern for every thoughtful citizen as well as the farmer. No manufacturing business or industry which is forced to use up its capital as well as its earnings to keep operating can long avoid bankruptcy. The economic

In the stress and urgency of producing more and more food at all costs, we could be forgiven, perhaps, for overlooking the immediate effects of this much intensified use of our better soils. But the extraordinary

## OUR COMPLETE SHORT STORY—

## DISCOVERY

Women Always Goes Sentimental And Weak At A Wedding.

By ESTHER M. DOUTY

As he waited before the altar, Kent Farish hoped desperately that the wedding guests would be late. His nervous perspiration only natural. Above the slow wedding music, his heart thudded in his ears. From the corner of his eye, he watched a small cloud of pink feathers floating on a wisp of veil above a well-molded but hard young face.

How dared she come? The little cat! And of all things, sitting right in front!

What would Marie think? She had worked so hard to have their wedding perfect.

He wet his lips and swallowed. "Take it easy," Clark, his best man, whispered.

Clark didn't know, of course. No one knew. How could he have been involved with Kay's love? He turned so he could see her face. That was a mistake. Kay was staring at him, her eyes bold. A meaning smile played about her lips. Her fingers toyed with the neckline he, like an idiot, had given her.

He jerked his head away, damning himself for the way he was taking up for Kay and again for not pressing Marie into an eloquent. She had done it, just as she said she would. She had brushed her way to the front where she could watch Kent vow to love and cherish Marie.

Would she really go through with her threat? He held his hands to his eyes to press away the black spots in front of them. Would she dare break up the ceremony by screaming accusations just as he and Marie were being pronounced man and wife?

There was a hush. Softly, the organ began the wedding march. Marie was entering with her father. She was lovely as a bride should be, her eyes soft and lustrous, her lips curving with happiness. He would always love her. If only he could forget Kay's mocking presence.

They knelt before the minister. Through the mistiness of her veil, he could see Marie's long eyelashes. He felt the soft pressure of her hand. She was reminding him of his responses.

Then, blessedly, it was over. Marie was all radiance and smiles as she stepped gracefully down the aisle, her hand on his arm proudly possessive.

He couldn't keep from darting a

guaranteed glance at Kay. She had a silly, almost weepy look.

Out in the fresh air, he rushed Marie into the waiting car. "Hurry! Hurry!" his brain dictated.

The car moved away from Marie's moist-eyed family, the guests. He saw Kay on the steps. Her jaw was squared, menacing.

The limousine rounded the driveway. Safe! Kent relaxed, suddenly exhausted and perspiring. Then his bride was in his arms.

"Sweetheart, loveliest," he murmured. He trembled as he kissed her.

Marie held him off fondly. "You foolish ditherer. I've never seen such a nervous bridegroom. But I'm glad you were, duckie. That showed Kay. Lenders how you really felt about things, all right."

Kent went rigid. "Kay?" His bride laughed. "But of course, Love. I sent Kay Lenders an invitation to our wedding. She came to see me last week—and had a lot to say. She was coming to the wedding, no matter what, so I thought she might as well get a good look. You know a woman always goes sentimental and weak at a wedding, even when the groom is her—

an old boy friend."

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

## Tom Creighton, Discoverer Of Flin Flon

FLIN FLON, Man.—Tom Creighton, 75, discoverer of the fabulously rich mining property which gave this northern Manitoba town its name, died after a lengthy illness. He chose the name Flin Flon from a "pulp mystery" thriller.

Creighton stumbled on the property in January, 1915. In the years since, the mine's production of copper, zinc, gold and silver has amounted to roughly \$250,000,000. The property is owned by the Hudson Bay Mining and Smelting Company Ltd.

Although Creighton made his discovery in 1915, it was not until more than a decade and a half later that all breeds began production. The mine contained refractory ore—its constituent parts could not be broken up by processes of the day—and many established companies declined to undertake the job.

After his possibilities had been rejected by a number of such companies, New York interests then entered. Creighton, after some preliminary work, decided that some method must be devised that would make the property a paying proposition. Millions of dollars were spent in experiments and five years passed before the dream was achieved.

From the wilderness, this town of 7,000 population straddling the Manitoba-Saskatchewan border, grew up as the mine began operations. Creighton had been carrying the story through the years, but he had been a prospector for some years before his "strike."

At the time of his death, he was president of the Hudson Bay Air Transport Ltd., a subsidiary of Hudson Bay Exploration and Development Co. Ltd., and was in charge of prospecting for Hudson Bay Mining and Smelting.

## RECIPES

## CREAMY CHOCOLATE FUDGE

2 cups unwrapped chocolate  
1 cup water  
2 cups evaporated milk  
1 cup granulated sugar  
1/2 cup brown sugar, firmly packed  
Dash salt  
2 tablespoons butter  
1 teaspoon vanilla

1 cup nut meats, chopped  
1/2 cup chocolate to melt and milk and place over low flame. Cook until mixture is smooth and blended, stirring constantly. Add sugars and salt and stir until sugars are dissolved and mixture boils. Continue boiling without stirring, until a small amount of mixture forms a very soft ball in cold water (238 deg. F.).

Remove from fire, add butter and vanilla. Cool to lukewarm (110 deg. F.) then beat until mixture begins to thicken and loses its gloss. Add nuts.

Turn into greased pan 8 by 4 inches. When firm cut into squares.

## SAVED BY GLACIAL ACTION

YORKTON, Sask.—Saskatchewan would be quite barren if it had not been subject to glacial action thousands of years ago, Leo Kulsh of Yorkton Collegiate, told the local natural history society. Glacial action, he said, had torn up limestone formations in Manitoba and spread them evenly over Saskatchewan.

## WILL NOT PAY SUBSIDY

Robert McCubbin, parliamentary assistant to Agriculture Minister Gardiner, said in the commons the government has no intention of paying a subsidy on butter.

## Canadians Eating More Pork Products

## CAMP, Ont.—Agriculture Minister

James Gardiner said Great Britain would have to wait beyond the end of the year to get the 160,000,000 pounds of bacon in the agreement with this country.

He said Canadians were eating about double the amount of pork products they did before the war. Total amount of the Anglo-Canadian bacon agreement might be made up of deliveries after end of the agreement, Gardiner said.

## Sweet Luncheon Treat

## SUGAR-PLUM LOAF

Measure loaf small bowl, 1/2 c. lukewarm water, 1 tsp. granulated sugar, 1/2 tsp. yeast, 1/2 tsp. salt. Sprinkle with 1 envelope Fleischmann's Royal Fast-Rising Dry Yeast. Let stand 10 min.

"TINNY" air, cream 1/2 c. shortening, gradually blend in 1/2 c. granulated sugar. Gradually beat in 2 well-beaten eggs. Stir in 1 c. milk and wet mixture. Stir in 1 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. Work in 4 c. one-half loaf bread, beat until smooth (mixture may curdle). Cover and set in warm place, free from draft. Let rise 1 hour. Stir in 1 tsp. salt, 1/2 c. washed and dried seedless raisins, 1/2 c. chopped walnuts, 1/2 c. chopped macadamia nuts, 1/2 c. cut-up candied cherries. ### LITTLE ITEMS OF LOCAL INTEREST

Mrs. Charlie Trumbley has returned to her home at Forest Lawn after spending the past seven weeks visiting her brother, Sheldon Brown who is a patient in the Saskatoon city hospital. She also visited with friends in Regina, Saskatoon and Rosetown.

The Junior baseball team played their first game of the season at Hosketh on Sunday and came home victors.

Miss Jolayne Milligan spent the Easter holiday at the home of her parents, Mr. and Mrs. W. Milligan.

Mr. and Mrs. A. Klassen and family of Calgary spent the week end at the home of Mrs. Klassen's sister, Mrs. Ruby Mortimer.

### FARMERS' RETURNS ON INVESTMENT

Which group has the greater return on investment—farmers who produce the food of the people, or those who are engaged in the business of processing and distributing the food? The answer to that question for northwest Alberta is the return furnished a striking comparison. It is found in the records of the Dominion Bureau of Statistics, from which a statement has been compiled by Dr. E.C. Hope, economist of the Canadian Federation of Agriculture.

Farmers' returns on their investment for the eleven years from 1931 to 1941 inclusive were nil. In fact, they were a very minus quantity. Farmers' returns on their investment from the years 1941 to 1947 inclusive were plus, with the exception of one year—1945. The average return for the six was 2.8 per cent. Returns on investment of 46 food companies in Canada for all the years from 1931 to 1947 were plus. The calculation of returns on investment were made on substantially the same basis in both cases.

In the case of the farmers' returns, the calculation was made on the basis of the estimated capital investment in the farms. The net farm income was used, together with the number of farm operators according to the Dominion Bureau's estimate for the years concerned. In the Federation's calculation, a yearly wage rate was allowed for farmers equal to the wage rate prevailing for the particular year in all industry in Canada. On this basis the total wage bill was then deducted from the net farm income, and the return on capital calculated accordingly.

In the case of 46 food companies the calculation was made on the basis of the net worth of the business, the net profit before taxes were paid, but after wages and salaries were paid, then the net profit after taxes were paid, and from that was calculated the percentage of return on net capital.

As an example: In 1937 the total estimated capital investment on farms was \$4,712,000,000, and the net farm income for that year was \$550 millions. The total number of farm operators was 711,000. The allowance for farm wages was \$865, which was the average for industrial wages in that year, which made a total estimated farm wage bill of \$686 millions. The net income after that allowance was deducted was then minus \$183 millions, making the net return on the capital minus 3.9 per cent.

In the same year, the total net worth of 46 food companies in Canada was \$119.3 millions. The net profit after wages and salaries had been deducted was 8.4 per cent and after taxes had been deducted was 6.3 per cent.

In the years from 1931 to 1936 inclusive the per cent of return on capital for farms of Canada was as follows:

1931	minus 6.5 per cent
1932	" 7.0 "
1933	" 6.4 "
1934	" 5.3 "
1935	" 5.1 "
1936	" 4.0 "

The comparison for the remaining years between the percentage return for farms and that for the 46 food companies was as follows, according to the above calculations:

Farms	Food Companies
1937	minus 3.9% plus 6.8%
1938	minus 5.4% plus 6.7%
1939	minus 3.2% plus 10.9%
1940	minus 3.9% plus 7.9%

### The future lies at the point of the drill

The names of Canada's new oil fields have been heard from coast to coast... Leduc, Woodbend, Redwater.

They are fields discovered in the greatest search for oil in Canada's history. Already they have brought benefits to all Canadians; and in the west where they are turning back the tide of expensive imports the direct savings are counted in millions.

But before the fullest benefits can reach everyone even more oil must be found.

The successes of the past two years have been possible because there were people willing to go on risking millions in the search in spite of repeated disappointments.

Now, after the barren years that went before, these new fields seem large—and they are large! But they are far from enough to make Canada self-sufficient.

Canada is still dependent on foreign countries for more than 90 per cent of her oil and so her own resources must be developed. Exploration must be continued. More and more wells must be drilled so that markets can be expanded.

There is not yet enough oil to justify the big investments that will be needed if all Canadians are to enjoy the fullest benefits of western resources. Pipe lines, for instance, cost a lot to build; but over the years they provide low-cost transportation—so necessary to reach out to wider markets. The Edmonton-Regina line planned by Imperial is but a beginning.

Further discoveries are the only means of breaking through the distance barriers that hamper oil with transportation costs. The future lies at the point of the drill.

### IMPERIAL OIL LIMITED

If you're interested in facts...

While it is now estimated the known oil in Alberta is roughly equal to our needs for the next five years, actually this oil could not be produced efficiently in less than 20 years.  
To meet her present oil requirements it has been estimated Canada needs reserves of several billion barrels.  
Imperial's 450-mile pipe line from Edmonton to Regina is expected to be in operation by the end of next year. Cost is estimated at between \$25 and \$40 million. It is a step towards wider markets.

Bringing you oil is a big job—  
and a costly one.
